Demonstrations of all these solutions are available on request, so don't hesitate to visit the stand to set up your personal tour of the advanced functionalities of our optronic solutions.

Why choose Thales for your night vision goggles? - Episode 4: Focus on the Tough Combat family

The Tough Combat family will revolutionise your military operations in the most challenging environments. Experience the excellence of a family of goggles tailor-made for **Special Forces and specialised units**. A perfect fusion of precision optics and compact design for the toughest land forces operations and warfighting missions.

Derived from our successful binocular for helicopter pilots and already **combat-proven by NATO Special Forces**, **BONIE HP offers stereoscopic night vision and large-aperture optics** for the most demanding ground missions on the darkest nights (Category 5):

Large-aperture optics (F 0.95) collect 60% more light than conventional binoculars. With stereoscopic vision and all the design benefits of Thales's precision optics, that's a 30% increase in performance on the darkest nights.
